<th>CATEGORY</th>
<th>SUBCATEGORY (DESCRIPTOR)</th>
<th>EXPANDED DESCRIPTOR</th>
</tr>
</thead>
<tbody>
<tr>
<td>Basic &amp; Clinical Intestinal Disorders</td>
<td>Basic Mechanisms of Tissue Injury, Repair and Fibrosis</td>
<td>Aims to feature studies on biochemistry, biophysics, and molecular cell biology of tissue injury, repair, and development of fibrosis.</td>
</tr>
<tr>
<td>Basic &amp; Clinical Intestinal Disorders</td>
<td>Celiac Disease and Gluten Related Disorders</td>
<td>Aims to include studies on the immunology and cellular/tissue pathogenesis of celiac disease and gluten sensitivity including human, translational, basic in vitro cell and tissue models, genetic, and in vivo animal studies. Genetic studies which involve the elucidation of the mechanism or genetic factors that contribute to immunopathogenesis of celiac disease are included in this descriptor. Also included are large population studies that address genetics, prevalence of celiac disease in adults or children, comparative studies of risk, and differences in populations or secular trends.</td>
</tr>
<tr>
<td>Basic &amp; Clinical Intestinal Disorders</td>
<td>Cell and Molecular Biology of Gastrointestinal Disorders</td>
<td>Features studies on molecular and cellular mechanisms of GI disease.</td>
</tr>
<tr>
<td>Basic &amp; Clinical Intestinal Disorders</td>
<td>Cell Biology, Biochemistry and Integrative Physiology</td>
<td>Features basic cell biology, biochemistry and physiology in GI health.</td>
</tr>
<tr>
<td>Basic &amp; Clinical Intestinal Disorders</td>
<td>Cell Signaling in Inflammation, Injury and Mucosal Repair</td>
<td>Aims to feature basic cellular and molecular signaling pathways involved in intestinal inflammation, injury and repair.</td>
</tr>
<tr>
<td>Basic &amp; Clinical Intestinal Disorders</td>
<td>Clostridioides Difficile Colitis: Pathogenesis, Diagnosis, Management and Therapy</td>
<td>Diagnosis, management and treatment of C. difficile infection (CDI). Host-microbial crosstalk in CDI susceptibility. Microbial and Biotic-based therapy for CDI. CDI pathogenesis (excluding toxin virulence mechanism).</td>
</tr>
<tr>
<td>Basic &amp; Clinical Intestinal Disorders</td>
<td>Diarrheal Disorders: Bacterial Overgrowth - Drug Induced and Other Enterocolitides (Microscopic, Enteropathy, Check Point Inhibitors, Etc.)</td>
<td>Aims to feature clinical, epidemiological and basic studies on pathogenesis of diarrheal diseases and other enteropathies including environmental enteropathy, ischemic, toxin, drug induced, allergic, autoimmune, diverticular disease. Consequences or outcomes of these illness would be also included. Also includes clinical and basic studies on novel small molecule and biologic therapeutics, and pre- and probiotics, for the intestinal disorders including diarrhea, irritable bowel, auto immune, environmental enteropathies, drug-induced, and microbial induced intestinal diseases. This descriptor excludes celiac disease, C. difficile and the chronic inflammatory bowel diseases (IBD).</td>
</tr>
<tr>
<td>Basic &amp; Clinical Intestinal Disorders</td>
<td>Epithelial Function and Ion, Water and Nutrient Absorption</td>
<td>Research focused on epithelial transport including mechanisms, roles of various components, down-stream effect of dys-regulated transport.</td>
</tr>
<tr>
<td>Basic &amp; Clinical Intestinal Disorders</td>
<td>Epithelial Junctions and Barrier Function</td>
<td>Features studies on biochemistry, biophysics, and molecular and cellular biology of cell adhesion and junction protein complexes, of epithelial polarization and assembly into restrictive monolayers, and in epithelial repair of barrier function after injury.</td>
</tr>
<tr>
<td>Basic &amp; Clinical Intestinal Disorders</td>
<td>Food Intolerances, Allergy, and Sensitivities</td>
<td>Disaccharide deficiencies, lactose, fructose or other food intolerances or sensitivities would be included and GI manifestations of food allergies. Studies that pertain to histamines or other responses to foods or dietary changes would also come under this descriptor. The interaction between microbiome and diet, in particular, where it relates to disease or gastrointestinal function/dysfunction would also come under this descriptor.</td>
</tr>
<tr>
<td>Basic &amp; Clinical Intestinal Disorders</td>
<td>Genetics and Gastrointestinal Disorders</td>
<td>Aims to feature clinical and basic studies on mono-genetic intestinal diseases and intestinal failure.</td>
</tr>
<tr>
<td>Basic &amp; Clinical Intestinal Disorders</td>
<td>In Vivo Models of Gastrointestinal Disorders</td>
<td>Features studies of GI diseases using animal models.</td>
</tr>
<tr>
<td>Basic &amp; Clinical Intestinal Disorders</td>
<td>Inflammation and GI Cancers</td>
<td>Research focused on inflammatory mechanisms that underlie GI cancer initiation, development, and progression. Research can include sporadic cancer as well as cancers secondary to inflammatory diseases (e.g. inflammatory bowel disease). Can include both predilical and clinical studies.</td>
</tr>
<tr>
<td>Basic &amp; Clinical Intestinal Disorders</td>
<td>Intestinal Inflammation, Fibrosis and Regeneration</td>
<td>Aims to feature basic studies of intestinal injury by inflammation, radiation or hypoxia, and mechanisms of repair, fibrosis, and stricture formation.</td>
</tr>
<tr>
<td>Basic &amp; Clinical Intestinal Disorders</td>
<td>Irritable Bowel Syndrome: Clinical</td>
<td>Aims to feature clinical studies on pathogenesis, diagnosis, disease outcome, treatment, disease progression of Irritable Bowel Syndrome.</td>
</tr>
<tr>
<td>CATEGORY</td>
<td>SUBCATEGORY (_DESCRIPTOR)</td>
<td>EXPANDED DESCRIPTOR</td>

<tr>
<td>-----------------------------------------</td>
<td>---------------------------------------------------------------</td>
<td>--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td>Basic &amp; Clinical Intestinal Disorders</td>
<td>Irritable Bowel Syndrome: Pathophysiology</td>
<td>Evaluates abstracts that focus on basic (preclinical) and translational studies including pathogenesis, diagnosis and disease progression of Irritable Bowel Syndrome.</td>
</tr>
<tr>
<td>Basic &amp; Clinical Intestinal Disorders</td>
<td>Microbial Pathogens and Toxins of the Intestine and Colon</td>
<td>Aims to feature studies on microbial pathogenesis for enterotoxins and bacterial, viral, fungal infections of gut - excluding C. Diff toxin induced disease.</td>
</tr>
<tr>
<td>Basic &amp; Clinical Intestinal Disorders</td>
<td>Microbiome and Infectious Diseases</td>
<td>Pathogens and pathogenic virulence mechanisms that affect the gut microbiome and cause infectious diseases (viral, fungal, parasitic, bacterial, excluding C. difficile infection). Alterations in genomics and function of commensal microbes that lead to negative, disease-causing consequences. Perturbations or aberrant host functions that lead to altered gut microbial function that can promote infectious diseases.</td>
</tr>
<tr>
<td>Basic &amp; Clinical Intestinal Disorders</td>
<td>Mucosal Innate Function and Innate Host Defense: Inflammatory Bowel Disease</td>
<td>Basic and translational studies on mucosal innate immune function and innate host defense - human or animal studies.</td>
</tr>
<tr>
<td>Basic &amp; Clinical Intestinal Disorders</td>
<td>Non-Immune Cells in Intestinal Inflammation: Epithelium and Strroma</td>
<td>Studies of the role of the cells of the epithelium and stromal cells (not professional immune cells) in intestinal inflammation.</td>
</tr>
<tr>
<td>Basic &amp; Clinical Intestinal Disorders</td>
<td>Organoid Models of Gastrointestinal Disorders</td>
<td>Features studies of gastrointestinal function or disease using organoids.</td>
</tr>
<tr>
<td>Basic &amp; Clinical Intestinal Disorders</td>
<td>Role of the Gut Microbiome and Pathogens in Immune and Inflammatory Diseases</td>
<td>Gut microbial role in inflammatory diseases of the bowel, including inflammatory bowel diseases, Celiac disease, food allergy, graft-versus-host, Dysmotility, etc. Mediators, mechanisms, and targets of microbial pathogenesis that cause and/or contribute to these diseases.</td>
</tr>
<tr>
<td>Basic &amp; Clinical Intestinal Disorders</td>
<td>Stem Cells in Health, Development, and Malignant Transformation</td>
<td>Features investigations of diverse aspects of stem cells, including so-called Cancer Stem Cells, stem cells as cells of origin for cancer, and stem cells in normal homeostasis and regeneration.</td>
</tr>
<tr>
<td>Basic &amp; Clinical Intestinal Disorders</td>
<td>Tissue Engineering and Regenerative Medicine</td>
<td>Cutting-edge techniques for refining, growing and expanding engineered GI tract, liver, and pancreas tissues for replacement or augmentation of compromised organs in patients.</td>
</tr>
<tr>
<td>Basic &amp; Clinical Intestinal Disorders</td>
<td>Transcriptional, Epigenetic and Genetic Regulation of GI Function and Disease</td>
<td>Aims to feature studies on gene expression, gene regulation, and gene suppression leading to gastrointestinal disease, including mechanisms by alterations of chromatin structure.</td>
</tr>
<tr>
<td>Basic &amp; Clinical Intestinal Disorders</td>
<td>Vitamins and Micronutrients: Basic and Clinical</td>
<td>Basic and clinical studies of vitamins and micronutrients, including requirements and intestinal absorption in health and disease, transporter function and regulation, nutritional biology, metabolism and deficiency states.</td>
</tr>
<tr>
<td>Cellular &amp; Molecular Gastroenterology</td>
<td>Basic Mechanisms of Tissue Injury, Repair and Fibrosis</td>
<td>Aims to feature studies on biochemistry, biophysics, and molecular cell biology of tissue injury, repair, and development of fibrosis.</td>
</tr>
<tr>
<td>Cellular &amp; Molecular Gastroenterology</td>
<td>Carcinoid and GI Neuroendocrine Neoplasm: Cell Biology, Genetics, Development, Diagnosis and Clinical Therapeutics</td>
<td>Research focused on gastrointestinal neuroendocrine tumors (NET). Research can include both preclinical (basic) and clinical studies. Research can span basic biology and mechanisms of NET development and progression, the genetic basis of NET, and diagnosis and treatment.</td>
</tr>
<tr>
<td>Cellular &amp; Molecular Gastroenterology</td>
<td>Cell and Molecular Biology of Gastrointestinal Disorders</td>
<td>Features studies on molecular and cellular mechanisms of GI disease.</td>
</tr>
<tr>
<td>Cellular &amp; Molecular Gastroenterology</td>
<td>Cell Biology, Biochemistry and Integrative Physiology</td>
<td>Features basic cell biology, biochemistry and physiology in GI health.</td>
</tr>
<tr>
<td>Cellular &amp; Molecular Gastroenterology</td>
<td>Cell Signaling in Inflammation, Injury and Mucosal Repair</td>
<td>Aims to feature basic cellular and molecular signaling pathways involved in intestinal inflammation, injury and repair.</td>
</tr>
<tr>
<td>Cellular &amp; Molecular Gastroenterology</td>
<td>Cellular Plasticity and Tissue Regeneration (Remodeling, Transdifferentiation, Dedifferentiation)</td>
<td>Aims to feature cellular alterations associated with remodeling or transformation events involved in GI injury and disease.</td>
</tr>
<tr>
<td>Cellular &amp; Molecular Gastroenterology</td>
<td>Epithelial Junctions and Barrier Function</td>
<td>Features studies on biochemistry, biophysics, and molecular and cell biology of cell adhesion and junction protein complexes, of epithelial polarization and assembly into restrictive monolayers, and in epithelial repair of barrier function after injury.</td>
</tr>

<td>---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td>Cellular &amp; Molecular Gastroenterology</td>
<td>Gastric Neoplasms: Precursor Lesions, Biology, Diagnosis and Therapy</td>
<td>Precursor lesions, biology, diagnosis and clinical therapeutics: research focused on precursors (i.e. intestinal metaplasia, dysplasia, MALTS), biology, diagnosis and clinical therapies directed at all types of gastric neoplasms.</td>
</tr>
<tr>
<td>Cellular &amp; Molecular Gastroenterology</td>
<td>Genetics and Gastrointestinal Disorders</td>
<td>Aims to feature clinical and basic studies on mono-genetic intestinal diseases and intestinal failure.</td>
</tr>
<tr>
<td>Cellular &amp; Molecular Gastroenterology</td>
<td>Growth Factors in Differentiation, Cell Proliferation, Morphogenesis and Apoptosis</td>
<td>Aims to feature studies on regulation of cell differentiation, proliferation, morphogenesis, and apoptosis in GI homeostasis and disease.</td>
</tr>
<tr>
<td>Cellular &amp; Molecular Gastroenterology</td>
<td>In Vivo Models of Gastrointestinal Disorders</td>
<td>Features studies of GI diseases using animal models.</td>
</tr>
<tr>
<td>Cellular &amp; Molecular Gastroenterology</td>
<td>Intestinal Inflammation, Fibrosis and Regeneration</td>
<td>Aims to feature basic studies of intestinal injury by inflammation, radiation or hypoxia, and mechanisms of repair, fibrosis, and stiicte formation.</td>
</tr>
<tr>
<td>Cellular &amp; Molecular Gastroenterology</td>
<td>Molecular Mechanisms of Growth and Development of the GI Tract, Liver and Pancreas</td>
<td>Basic cellular mechanisms driving the establishment, development, and function of the digestive organs. Pathways driving cellular differentiation and organ maturation.</td>
</tr>
<tr>
<td>Cellular &amp; Molecular Gastroenterology</td>
<td>Organoid Models of Gastrointestinal Disorders</td>
<td>Features studies of gastrointestinal function or disease using organoids.</td>
</tr>
<tr>
<td>Cellular &amp; Molecular Gastroenterology</td>
<td>Stem Cells in Health, Development, and Malignant Transformation</td>
<td>Features investigations of diverse aspects of stem cells, including so-called Cancer Stem Cells, stem cells as cells of origin for cancer, and stem cells in normal homeostasis and regeneration.</td>
</tr>
<tr>
<td>Cellular &amp; Molecular Gastroenterology</td>
<td>Tissue Engineering and Regenerative Medicine</td>
<td>Cutting-edge techniques for refining, growing, and expanding engineered GI tract, liver, and pancreas tissues for replacement or augmentation of compromised organs in patients.</td>
</tr>
<tr>
<td>Cellular &amp; Molecular Gastroenterology</td>
<td>Transcriptional, Epigenetic and Genetic Regulation of GI Function and Disease</td>
<td>Aims to feature studies on gene expression, gene regulation, and gene suppression leading to gastrointestinal disease, including mechanisms by alterations of chromatin structure.</td>
</tr>
<tr>
<td>Cellular &amp; Molecular Gastroenterology</td>
<td>Tuft Cells and Endocrine Function in the GI Tract</td>
<td>Features mechanisms of cell biology of Tuft and endocrine cell function in homeostasis and disease, including chemosensin, hormone secretion and inflammation.</td>
</tr>
<tr>
<td>Clinical Practice</td>
<td>Colorectal Cancer Screening and Surveillance</td>
<td>Patient-focused studies (Clinical or translational) focused on implementing CRC screening or surveillance, including decision making, implementation of biomarkers in different patient populations; Barriers to screening due to health disparities.</td>
</tr>
<tr>
<td>Clinical Practice</td>
<td>Epidemiology of Gastrointestinal Disorders</td>
<td>Evaluates abstracts using epidemiologic methods that do not easily fit into other descriptors.</td>
</tr>
<tr>
<td>Clinical Practice</td>
<td>Guideline Adoption and Implementation</td>
<td>Evaluates abstracts where the aim of the study is to determine the adherence to prevailing clinical guidelines. This descriptor also includes abstracts evaluating the success of efforts/methods to implement guidelines into clinical practice and/or the outcome of guideline implementation into clinical practice.</td>
</tr>
<tr>
<td>Clinical Practice</td>
<td>Health Care Delivery and Policy (Practice Management, Reimbursement, Access to Care, Policy)</td>
<td>Evaluates abstracts pertaining to business issues of practice (either community or academic), government or insurer policies including analyses of their effects, and access to care. This descriptor is not intended for cost-effectiveness analyses, process improvement, or performance metrics.</td>
</tr>
<tr>
<td>Clinical Practice</td>
<td>Health Disparities and Global Health</td>
<td>Evaluates abstracts regarding disparities in health outcomes based on race or socioeconomic status. Also evaluates studies specific to healthcare in developing countries, including epidemiology, delivery of healthcare, and outcomes.</td>
</tr>
<tr>
<td>Clinical Practice</td>
<td>Health Economics (Cost of Illness, Cost-Effectiveness, and Health Economic Models)</td>
<td>Evaluates studies of computer simulations or empirically observed cost data. Not intended for abstracts regarding practice management issues or reimbursement.</td>
</tr>
<tr>
<td>Clinical Practice</td>
<td>Medical Education and Training</td>
<td>Evaluates studies where the unit of observation is the provider or trainee, including observational studies and interventions. Not intended for patient case reports or clinical pearls.</td>
</tr>
<tr>
<td>Clinical Practice</td>
<td>Patient Reported Outcomes: IBD, GERD, Functional Disorders, Other</td>
<td>Evaluates abstracts regarding development or validation of Patient Reported Outcomes (PROs) instruments, including those regarding quality of life. Also evaluates abstracts where the primary outcome is Patient Reported Outcomes, particularly if the abstract does not easily fit in another descriptor.</td>
</tr>
<tr>
<td>CATEGORY</td>
<td>SUBCATEGORY (DESCRIPTOR)</td>
<td>EXPANDED DESCRIPTOR</td>
</tr>
<tr>
<td>--------------------------------</td>
<td>----------------------------------------------------------------------------------------</td>
<td>----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td>Clinical Practice</td>
<td>Performance Metrics, Process Improvement, and Implementation Science</td>
<td>Evaluates abstracts pertaining to, for instance, methodologic advances in measuring quality of care, studies identifying key processes to be targeted for improving quality of care, and observational or experimental studies with a primary outcome being quality of care. Also evaluates abstracts regarding studies evaluating implementation of best practices or quality assurance programs in clinical practice. The descriptor is not intended for abstracts pertaining to quality of life, endoscopic innovations, or animal studies.</td>
</tr>
<tr>
<td>Clinical Practice</td>
<td>Population Health Screening; Colorectal Cancer; Esophageal Cancer; Hepatocellular Carcinoma, Other Screening</td>
<td>Evaluates abstracts pertaining to screening or surveillance in populations. For instance, screening or surveillance for cancers of the colon, esophagus, liver, or pancreas. Additionally includes population health screening for other health outcomes, such as celiac disease, H. pylori, etc.</td>
</tr>
<tr>
<td>Clinical Practice</td>
<td>Systematic Reviews and Meta-Analysis of Gastrointestinal Disorders</td>
<td>Evaluates abstracts using systematic review and meta-analyses that do not fit easily into other descriptors.</td>
</tr>
<tr>
<td>Endoscopy, Technology &amp; Imaging</td>
<td>Colorectal Cancer Screening and Surveillance</td>
<td>Patient-focused studies (Clinical or translational) focused on implementing CRC screening or surveillance, including decision making, implementation of biomarkers in different patient populations; Barriers to screening due to health disparities;</td>
</tr>
<tr>
<td>Endoscopy, Technology &amp; Imaging</td>
<td>Confocal Endomicroscopy and Other Optical Sectioning Techniques</td>
<td>Evaluates abstracts pertaining to use of an microscope to produce real-time images within the human body or animal that correspond to histology. This may include confocal endomicroscopy or volumetric laser endomicroscopy.</td>
</tr>
<tr>
<td>Endoscopy, Technology &amp; Imaging</td>
<td>Diagnostic and Therapeutic Applications of Novel Imaging and Other Technologies</td>
<td>Evaluates abstracts about the use of novel imaging or technology for the diagnosis or therapy of gastrointestinal, liver or pancreaticobiliary disorders.</td>
</tr>
<tr>
<td>Endoscopy, Technology &amp; Imaging</td>
<td>Enhanced Endoscopic Imaging Including Molecular Imaging; Spectroscopy and Fluorescence Imaging; and Optical Coherence</td>
<td>Evaluates abstracts that utilize enhanced endoscopic imaging, including molecular imaging; spectroscopy, fluorescence imaging and optical coherence tomography.</td>
</tr>
<tr>
<td>Endoscopy, Technology &amp; Imaging</td>
<td>Imaging of the GI Tract</td>
<td>Evaluates abstracts that studies the role of imaging of any organ of the gastrointestinal tract, namely the esophagus, stomach, small bowel, colon, pancreas, bile duct, liver or gallbladder.</td>
</tr>
<tr>
<td>Endoscopy, Technology &amp; Imaging</td>
<td>Imaging Techniques Including Comparative Studies and Efficacy</td>
<td>Evaluates research that compares outcomes of one or more imaging or technology devices in animal models or humans.</td>
</tr>
<tr>
<td>Endoscopy, Technology &amp; Imaging</td>
<td>Machine Learning, Artificial Intelligence, and Computers in Endoscopy</td>
<td>Evaluates abstracts that study the use of machine learning, artificial intelligence, or computer aided interpretation of endoscopic or radiologic imaging of any organ of the gastrointestinal tract.</td>
</tr>
<tr>
<td>Endoscopy, Technology &amp; Imaging</td>
<td>Novel/Experimental Endoscopy</td>
<td>Evaluates research in animals or humans that studies the application of novel endoscopic tools or equipment, the role of endoscopy to treat a novel indication or application of a new technique.</td>
</tr>
<tr>
<td>Esophageal, Gastric &amp; Duodenal Disorders</td>
<td>Functional Dyspepsia, Nausea and Vomiting</td>
<td>Evaluates abstracts pertaining to abdominal pain, nausea, functional dyspepsia, non ulcer dyspepsia, psychological distress, pathophysiologic distress, vomiting, rumination, cyclical vomiting syndrome, cannabis hyperemesis syndrome, epigastric pain syndrome, postprandial distress syndrome.</td>
</tr>
<tr>
<td>Esophageal, Gastric &amp; Duodenal Disorders</td>
<td>Gastric Neoplasms: Precursor Lesions, Biology, Diagnosis and Therapy</td>
<td>Precursor lesions, biology, diagnosis and clinical therapeutics: research focused on precursors (i.e. intestinal metaplasia, dysplasia, MALTs), biology, diagnosis and clinical therapies directed at all types of gastric neoplasms.</td>
</tr>
<tr>
<td>Esophageal, Gastric &amp; Duodenal Disorders</td>
<td>Molecular Mechanisms of Growth and Development of the GI Tract, Liver and Pancreas</td>
<td>Basic cellular mechanisms driving the establishment, development, and function of the digestive organs. Pathways driving cellular differentiation and organ maturation.</td>
</tr>
<tr>
<td>Esophageal, Gastric &amp; Duodenal Disorders</td>
<td>Oropharyngeal and Esophageal Motility Disorders</td>
<td>Evaluates abstracts related to the diagnosis and management of oropharyngeal and esophageal motility disorders. It is not intended for abstracts related to GERD or EoE.</td>
</tr>
<tr>
<td>Esophageal, Gastric &amp; Duodenal Disorders</td>
<td>Portal Hypertension, Complications of Cirrhosis, and GI Bleeding</td>
<td>Portal hypertension, variceal bleeding, ascites, hepatic encephalopathy, hepatic hydrothorax, portopulmonary hypertension, hepatopulmonary syndrome.</td>
</tr>
<tr>
<td>Esophageal, Gastric &amp; Duodenal Disorders</td>
<td>Barrett’s Esophagus: Diagnosis, Management and Surveillance</td>
<td>Evaluates abstracts related to diagnosis, management and surveillance of patients with Barrett’s esophagus. It is not intended for abstracts relating to GERD or EoE or esophageal motility disorders.</td>
</tr>
<tr>
<td>CATEGORY</td>
<td>SUBCATEGORY (DESCRIPTOR)</td>
<td>EXPANDED_DESCRIPTOR</td>
</tr>
<tr>
<td>----------</td>
<td>--------------------------</td>
<td>---------------------</td>
</tr>
<tr>
<td>Esophageal, Gastric &amp; Duodenal Disorders</td>
<td>Eosinophilic Esophagitis: Clinical</td>
<td>Evaluates clinical abstracts related to the diagnosis, testing or management of patients with eosinophilic esophagitis. It is intended for the clinical fields, but it is not intended for abstracts relating to GERD, Barrett's esophagus or esophageal motility disorders.</td>
</tr>
<tr>
<td>Esophageal, Gastric &amp; Duodenal Disorders</td>
<td>Eosinophilic Esophagitis: Translational or Basic</td>
<td>Evaluates basic science or translational abstracts related to disease pathogenesis and treatment. It is not intended for abstracts relating to GERD, Barrett's esophagus or esophageal motility disorders.</td>
</tr>
<tr>
<td>Esophageal, Gastric &amp; Duodenal Disorders</td>
<td>GERD/Barrett's: Pathogenesis</td>
<td>Evaluates clinical or translational abstracts about pathogenesis of GERD and Barrett's esophagus. This descriptor is not intended for pathogenesis of other esophageal conditions such as EoE or esophageal carcinoma.</td>
</tr>
<tr>
<td>Esophageal, Gastric &amp; Duodenal Disorders</td>
<td>GERD: Complications and Extra-Esophageal Presentations</td>
<td>Evaluates abstracts related to complications of GERD such as esophageal strictures as well as extraesophageal presentations such as asthma, laryngitis, cough, chest pain or post lung transplant rejection. It is not intended for abstracts relating to Barrett's esophagus or EoE or esophageal motility disorders.</td>
</tr>
<tr>
<td>Esophageal, Gastric &amp; Duodenal Disorders</td>
<td>GERD: Diagnostic Testing</td>
<td>Evaluates abstracts related to diagnostic testing in GERD. It is not intended for abstracts relating to Barrett's esophagus or EoE or esophageal motility disorders.</td>
</tr>
<tr>
<td>Esophageal, Gastric &amp; Duodenal Disorders</td>
<td>GERD: Medical, Surgical and Endoscopic Therapies</td>
<td>Evaluates abstracts related to medical, surgical, and endoscopic therapies in the management of GERD and its related complications. It is not intended for abstracts related to GERD pathogenesis, complications and extra-esophageal presentations, and diagnostic testing.</td>
</tr>
<tr>
<td>Esophageal, Gastric &amp; Duodenal Disorders</td>
<td>Helicobacter pylori: Epidemiology, Diagnosis and Outcomes</td>
<td>Evaluates abstracts related to epidemiology, diagnosis and, outcomes of H. pylori infection. It is not intended for abstracts related to H. pylori host response, pathogenic mechanisms, treatment, or antimicrobial resistance.</td>
</tr>
<tr>
<td>Esophageal, Gastric &amp; Duodenal Disorders</td>
<td>Helicobacter pylori: Host Response and Pathogenesis</td>
<td>Evaluates abstracts related to host response induced by H. pylori infection and understanding mechanisms of disease pathogenesis during H. pylori infection. It is not intended for abstracts related to H. pylori epidemiology, treatment, diagnosis, or outcomes.</td>
</tr>
<tr>
<td>Esophageal, Gastric &amp; Duodenal Disorders</td>
<td>Helicobacter pylori: Treatment and Antimicrobial Resistance</td>
<td>Evaluates abstracts related to H. pylori treatment and antimicrobial resistance. It is not intended for abstracts related to H. pylori host response, pathogenic mechanisms, epidemiology, or outcomes.</td>
</tr>
<tr>
<td>Esophageal, Gastric &amp; Duodenal Disorders</td>
<td>Mucosal Defense, Secretion, Injury, Repair and Healing</td>
<td>Evaluates abstracts related to mechanisms of upper GI mucosal defense, secretion, injury, repair and healing. It is not intended for abstracts related to H. pylori host response or pathogenic mechanisms.</td>
</tr>
<tr>
<td>Esophageal, Gastric &amp; Duodenal Disorders</td>
<td>Peptic Ulcer Disease and Non-Variceal UGI Bleeding</td>
<td>Evaluates abstracts related to the epidemiology, clinical features, mechanisms/causes and treatments of peptic ulcers and upper GI bleeding excluding variceal bleeding.</td>
</tr>
<tr>
<td>Gastrointestinal Oncology</td>
<td>Biomarkers for Detection, Treatment and Prognosis of GI Cancers</td>
<td>Research focused on biomarkers used for the detection, treatment, and/or prognosis of GI cancers. Biomarker analysis can be on tissues or serum. Biomarkers can include DNA, RNAs, miRNAs, or proteins. Research can include both clinical and preclinical models of GI cancer.</td>
</tr>
<tr>
<td>Gastrointestinal Oncology</td>
<td>Cancer Prevention and Chemoprevention</td>
<td>Research focused on cancer prevention or chemoprevention of GI cancers. Research can include both clinical and preclinical models of GI cancer. Innovative cancer prevention techniques, including dietary and lifestyle modification, as well as pharmacologic strategies, are included in this descriptor.</td>
</tr>
<tr>
<td>Gastrointestinal Oncology</td>
<td>Canceromics: Cancer Genomics, Epigenomics, Metabolomics, Proteomics and Systems Biology</td>
<td>Cancer genomics, epigenomics, metabolomics, proteomics, and systems biology research focused on genomics (DNA), epigenomics (i.e. methylation, histone modifications), proteomics (protein), and systems biology (i.e. metabolic or cell signaling networks) aimed at the complex interactions in cancer biology. Research can include both clinical and preclinical models of GI cancer.</td>
</tr>
<tr>
<td>Gastrointestinal Oncology</td>
<td>Carcinoid and GI Neuroendocrine Neoplasm: Cell Biology, Genetics, Development, Diagnosis and Clinical Therapeutics</td>
<td>Research focused on gastrointestinal neuroendocrine tumors (NET). Research can include both preclinical (basic) and clinical studies. Research can span basic biology and mechanisms of NET development and progression, the genetic basis of NET, and diagnosis and treatment.</td>
</tr>
<tr>
<td>CATEGORY</td>
<td>SUBCATEGORY (DESCRIPTOR)</td>
<td>EXPANDED DESCRIPTOR</td>
</tr>
<tr>
<td>----------------------------------------------</td>
<td>-----------------------------------------------------------------------------------------</td>
<td>----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------</td>

<td>Colorectal Cancer Screening and Surveillance</td>
<td>Patient-focused studies (Clinical or translational) focused on implementing CRC screening or surveillance, including decision making, implementation of biomarkers in different patient populations; Barriers to screening due to health disparities.</td>
</tr>
<tr>
<td>Gastrointestinal Oncology</td>
<td>Epidemiology of Gastrointestinal Disorders</td>
<td>Evaluates abstracts using epidemiologic methods that do not easily fit into other descriptors.</td>
</tr>
<tr>
<td>Gastrointestinal Oncology</td>
<td>Esophageal and Junctional Neoplasms: Precursor Lesions, Biology, Diagnosis and Clinical Therapeutics</td>
<td>Precursor Lesions, Biology, Diagnosis and Clinical Therapeutics: research focused on precursors (i.e. Barrett's metaplasia, dysplasia), biology, diagnosis and clinical therapies directed at both esophageal squamous and adenocarcinomas. This focus include the spectrum from basic molecular studies to preclinical and clinical therapies, but not endoscopic therapies.</td>
</tr>
<tr>
<td>Gastrointestinal Oncology</td>
<td>Familial Cancer Syndromes and Cancer Genetics</td>
<td>Research focused on inherited risk factors for cancer, including diagnostics, prevention, and therapies. This includes germline gene alterations, epigenetic and imprinted mechanisms, and somatic mutational profiling. Includes any and all inherited syndromes associated with GI cancer risk.</td>
</tr>
<tr>
<td>Gastrointestinal Oncology</td>
<td>Gastric Neoplasms: Precursor Lesions, Biology, Diagnosis and Therapy</td>
<td>Precursor lesions, biology, diagnosis and clinical therapies: research focused on precursors (i.e. intestinal metaplasia, dysplasia, MALTs), biology, diagnosis and clinical therapies directed at all types of gastric neoplasms.</td>
</tr>
<tr>
<td>Gastrointestinal Oncology</td>
<td>GI Cancer Research Models: Organoids, Engineered Cell and Tissue Platforms, and Animal Models</td>
<td>Organoids, Engineered Cell and Tissue Platforms, and Animal Models: Research in which GI cancer models are the focus, including new transgenic animal models for GI cancers as well as crosses or other modifications that significantly alter the cancer phenotype and provide insight into cancer pathogenesis. It also includes any primary cell culture of tissues from human, murine, or other organisms. Also includes approaches to genetically modify cells including CRISPR and other techniques.</td>
</tr>
<tr>
<td>Gastrointestinal Oncology</td>
<td>Inflammation and GI Cancers</td>
<td>Research focused on inflammatory mechanisms that underlie GI cancer initiation, development, and progression. Research can include sporadic cancer as well as cancers secondary to inflammatory diseases (e.g. inflammatory bowel disease). Can include both preclinical and clinical studies.</td>
</tr>
<tr>
<td>Gastrointestinal Oncology</td>
<td>Liver and Biliary Carcinoma: Management, Etiology, Diagnosis and Natural History</td>
<td>Precursor Lesions, Biology, Diagnosis and Clinical Therapeutics: research focused on precursors (i.e. dysplasia), biology, diagnosis and clinical therapies directed at liver and biliary cancers.</td>
</tr>
<tr>
<td>Gastrointestinal Oncology</td>
<td>Metabolism, Obesity, Microbiome, Diet, and Nutrition in GI Cancer</td>
<td>Research focused on the roles played by metabolism, obesity, the microbiome, and nutrition in the initiation and progression of cancers of the gastrointestinal tract. This includes studies exploring these processes promoting carcinogenesis separately or as interacting and inter-related pathways, as well as in-depth studies of molecular pathways. It also includes mechanistic or population studies exploring novel cancer prevention and treatment strategies which modulate a subject’s metabolism, obesity, microbiome, and nutritional state, including the use of nutritional supplements.</td>
</tr>
<tr>
<td>Gastrointestinal Oncology</td>
<td>Microbiome and Cancer</td>
<td>Role of the gut microbiome in the initiation and progression of cancers of the gastrointestinal tract and other organ systems. Also the role of gut microbes in cancer prevention and modulation of tumor immunity and metabolism. Mechanism and mediators that are involved in these processes.</td>
</tr>
<tr>
<td>Gastrointestinal Oncology</td>
<td>Molecular Mechanisms and Pathways in Carcinogenesis and Metastasis: Bench to Bedside</td>
<td>Research focused on signaling pathways, molecules, receptors, and downstream effectors that regulate key processes in cancer cells, including signaling that drives carcinogenesis, cancer cell survival, and metastasis, as well as other cellular processes. Research can be span from basic molecular research to preclinical studies in cancer models.</td>
</tr>
<tr>
<td>Gastrointestinal Oncology</td>
<td>Pancreatic Cancer: Risk Factors, Biology, Diagnosis and Clinical Therapeutics</td>
<td>Both clinical and basic science aspects specially with biomarkers can fit in here. Almost all adenocarcinoma abstracts should fit this descriptor although there may be some overlap for cystic neoplasms and cancer with the descriptor PCN, IPMN and neuroendocrine tumors.</td>
</tr>
<tr>

<tr>
<td>Gastrointestinal Oncology</td>
<td>Systematic Reviews and Meta-Analysis of Gastrointestinal Disorders</td>
<td>Evaluates abstracts using systematic review and meta-analyses that do not fit easily into other descriptors.</td>
</tr>
<tr>
<td>Gastrointestinal Oncology</td>
<td>Translational and Targeted Therapies for GI Cancers</td>
<td>Research focused on GI cancer therapies, including development of novel targets, innovative reagents and treatments. Includes high through-put screens, research into delivery vehicles including nanoparticles, and includes chemotherapy, biological therapies, irradiation and other treatment modalities.</td>
</tr>
<tr>
<td>Gastrointestinal Oncology</td>
<td>Tumor Cell Biology, Immunology, and Microenvironment</td>
<td>Research focused on cancer cell biology, including mechanisms of cell proliferation, survival, migration, morphology, metabolism, and gene/protein expression, with a focus on molecular mechanisms responsible for the cancer cell phenotype. This also includes studies of all aspects of the local tissue environment (non-tumor cells, extracellular matrix) influencing cancer cell biology and survival.</td>
</tr>
<tr>
<td>GI Fellow-Directed QI Session</td>
<td>GI Fellow-Directed QI Session</td>
<td>Only those currently enrolled in a GI fellowship program can submit abstracts to this descriptor, and the GI fellow MUST be the primary author on the abstract submission. Medical residents are not eligible to submit abstracts to this abstract descriptor category. Abstracts submitted to this category are only eligible for presentation at a special session, focused on quality improvement, sponsored by the Education &amp; Training and Trainee &amp; Early Career Committees of the AGA Institute. Please select GI Fellow-Directed QI Session for your category and subcategory only if submitting for this session.</td>
</tr>
<tr>
<td>Immunology, Microbiology &amp; Inflammatory Bowel Diseases</td>
<td>Animal Models: Pre-Clinical Treatment of Intestinal Inflammation</td>
<td>Studies in animal models that assess potential therapeutic pathways and interventions for IBD.</td>
</tr>
<tr>
<td>Immunology, Microbiology &amp; Inflammatory Bowel Diseases</td>
<td>Diarrheal Disorders: Bacterial Overgrowth - Drug Induced and Other Enterocolitides (Microscopic, Enteropathy, Check Point Inhibitors, Etc.)</td>
<td>Aims to feature clinical, epidemiological and basic studies on pathogenesis of diarrheal diseases and other enteropathies including environmental enteropathy, ischemic, toxin, drug induced, allergic, autoimmune, diverticular disease. Consequences or outcomes of these illnesses would be also included. Also includes clinical and basic studies on novel small molecule and biologic therapeutics, and pre- and probiotics, for the intestinal disorders including diarrhea, irritable bowel, auto immune, environmental enteropathies, drug-induced, and microbial induced intestinal diseases. This descriptor excludes celiac disease, C. difficile and the chronic inflammatory bowel diseases (IBD).</td>

<tr>
<td>Pancreatic Disorders</td>
<td>The Microbiome in Pancreatitis, Pancreatic Malabsorption and Pancreatic Tumorigenesis</td>
<td>Considers emerging work in microbiome in pancreatic diseases including effects of pancreatic diseases on the microbiome, as well as the effects of the microbiome on pancreatic diseases.</td>
</tr>
<tr>
<td>Pancreatic Disorders</td>
<td>Clinical Acute Pancreatitis</td>
<td>Considers epidemiology, etiology, severity prediction as well as medical, endoscopic and other minimally invasive management on outcomes. There is a separate basic science descriptor for basic science work in acute pancreatitis and not this one.</td>
</tr>
<tr>
<td>Pancreatic Disorders</td>
<td>Clinical Chronic Pancreatitis</td>
<td>Considers clinical work in chronic pancreatitis including epidemiology, etiology, biomarkers, early and routine diagnosis, tests for exocrine insufficiency, enzyme replacement therapy, all treatments, type 3c diabetes clinical aspects.</td>
</tr>
<tr>
<td>Pancreatic Disorders</td>
<td>Interactions between the Exocrine and Endocrine Pancreas</td>
<td>This section is for both basic and clinical work addressing the interplay between the exocrine and endocrine pancreas including neoplastic and inflammatory disease of the exocrine pancreas effects on the endocrine pancreas; and the effects of endocrine pancreas on the exocrine pancreas (i.e. diabetes effects on exocrine pancreatic function and disease).</td>
</tr>
<tr>
<td>Pancreatic Disorders</td>
<td>Pancreatic Cystic Neoplasms, IPMN and Neuroendocrine Tumors</td>
<td>This section is completely clinical for these 3 areas and any basic science work should be submitted to one of the 5 basic science descriptors. However, the imaging and endoscopy abstracts of these 3 diseases are encouraged to be submitted to the endoscopy and imaging descriptor.</td>
</tr>
<tr>
<td>Pancreatic Disorders</td>
<td>Pancreatic Disorders: Endoscopy and Imaging</td>
<td>Endoscopic and radiological imaging abstracts on all clinical pancreatic diseases are best submitted here as this section is specially created to accommodate this kind of work. This being a recently introduced descriptor, the work has better chances of getting accepted in this descriptor location.</td>
</tr>
<tr>
<td>Pancreatic Disorders</td>
<td>Pancreatic Genetics, Epigenetics, Physiology, Cell Biology and Pancreatitisis: Inflammation, Fibrogenesis and Immunology</td>
<td>Considers research in mechanisms of disease initiation and promotion. This is an avenue for the basic work exclusively in both acute and chronic pancreatitis regardless of the type.</td>
</tr>
<tr>
<td>Pediatric Gastroenterology &amp; Developmental Biology</td>
<td>Clinical Pediatric Gastroenterology</td>
<td>Aims to feature clinical studies on a variety of pediatric gastrointestinal disorders that do not include inflammatory bowel disease, liver, biliary, functional or motility disorders. This can include, but is not limited to, celiac disease, pancreatic conditions, enteropathies, eosinophilic disorders and malabsorption.</td>
</tr>

<td>-----------------------------------------</td>
<td>------------------------------------------------------------------------</td>
<td>-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td>Pediatric Gastroenterology &amp; Developmental Biology</td>
<td>Development of the Enteric Nervous System</td>
<td>Aims to feature clinical, epidemiological and basic studies on pathogenesis of diarrheal diseases and other enteropathies including environmental enteropathy, ischemic, toxin, drug induced, allergic, autoimmune, diverticular disease. Consequences or outcomes of these illness would be also included. Also includes clinical and basic studies on novel small molecule and biologic therapeutics, and pre- and probiotics, for the intestinal disorders including diarrhea, irritable bowel, auto immune, environmental enteropathies, drug-induced, and microbial induced intestinal diseases. This descriptor excludes celiac disease, C. difficile and the chronic inflammatory bowel diseases (IBD).</td>
</tr>
<tr>
<td>Pediatric Gastroenterology &amp; Developmental Biology</td>
<td>Developmental Biology, Growth, and Aging in the GI Tract</td>
<td>Development, maturation, and change over the lifespan of the digestive organs. Mechanisms and regulation of normal turnover/renewal in the gut. Hoe positional cues, stromal signals, and the microenvironment affect cell maturation.</td>
</tr>
<tr>
<td>Pediatric Gastroenterology &amp; Developmental Biology</td>
<td>Food Intolerances, Allergy, and Sensitivities</td>
<td>Disaccharide deficiencies, lactose, fructose or other food intolerances or sensitivities would be included and GI manifestations of food allergies. Studies that pertain to histamines or other responses to foods or dietary changes would also come under this descriptor. The interaction between microbiome and diet, in particular, where it relates to disease or gastrointestinal function/dysfunction would also come under this descriptor.</td>
</tr>
<tr>
<td>Pediatric Gastroenterology &amp; Developmental Biology</td>
<td>Genetics and Gastrointestinal Disorders</td>
<td>Aims to feature clinical and basic studies on mono-genetic intestinal diseases and intestinal failure.</td>
</tr>
<tr>
<td>Pediatric Gastroenterology &amp; Developmental Biology</td>
<td>IBD: Special Populations, Conception, Adolescent, and Older</td>
<td>Clinical studies related to male/female fertility, pregnancy outcomes; the adolescent/transitioning patient; and the older patient with IBD. These may be randomized trials, observational, epidemiology and natural history data.</td>
</tr>
<tr>
<td>Pediatric Gastroenterology &amp; Developmental Biology</td>
<td>In Vivo Models of Gastrointestinal Disorders</td>
<td>Features studies of GI diseases using animal models.</td>
</tr>
<tr>
<td>Pediatric Gastroenterology &amp; Developmental Biology</td>
<td>Molecular Mechanisms of Growth and Development of the GI Tract, Liver and Pancreas</td>
<td>Basic cellular mechanisms driving the establishment, development, and function of the digestive organs. Pathways driving cellular differentiation and organ maturation.</td>
</tr>
<tr>
<td>Pediatric Gastroenterology &amp; Developmental Biology</td>
<td>Organoid Models of Gastrointestinal Disorders</td>
<td>Features studies of gastrointestinal function or disease using organoids.</td>
</tr>
<tr>
<td>Pediatric Gastroenterology &amp; Developmental Biology</td>
<td>Pediatric Functional and Motility Disorders</td>
<td>Aims to feature clinical and translational studies of functional and motility disorders in pediatric populations.</td>
</tr>
<tr>
<td>Pediatric Gastroenterology &amp; Developmental Biology</td>
<td>Pediatric IBD: Clinical and Translational Studies</td>
<td>The roles and mechanisms of gut microbes in influencing host metabolism, immunity, growth and development, etc. during the neonatal, childhood, and adolescent periods. The impact of dysbiosis on disease risk and outcomes later in life. Host factors that determine the compositional and functional development of gut microbiomes in pediatric populations.</td>
</tr>
<tr>
<td>Pediatric Gastroenterology &amp; Developmental Biology</td>
<td>Pediatric Microbiome and Microbial Therapies</td>
<td>Studies of the metabolic abnormalities and morbidities associated with obesity in children, including metabolic syndrome and NAFLD, and their relationship to nutrition and genetics. Also, studies of approaches to the treatment of pediatric obesity, including the roles of nutritional intervention, lifestyle changes, pharmacotherapy and bariatric surgery.</td>
</tr>
<tr>
<td>Pediatric Gastroenterology &amp; Developmental Biology</td>
<td>Pediatric Nutrition and Obesity</td>
<td>Aims to feature clinical and translational studies focused on pediatric pancreatic, liver and biliary diseases.</td>
</tr>
<tr>
<td>Pediatric Gastroenterology &amp; Developmental Biology</td>
<td>Stem Cells in Health, Development, and Malignant Transformation</td>
<td>Features investigations of diverse aspects of stem cells, including so-called Cancer Stem Cells, stem cells as cells of origin for cancer, and stem cells in normal homeostasis and regeneration.</td>
</tr>
